CATALOGIC SOFTWARE
The Smart Choice for Data Protection

Innovating since 1996, Catalogic Software delivers one of the most comprehensive, cost-effective and secure software-only data protection solutions for the modern enterprise's on-premise, cloud and edge workloads. Here's why Catalogic software suite for backup, recovery, replication and migration makes it a smart choice.

Key Highlights

- **Comprehensive Coverage:** Protect virtually any OS, application, hypervisor, cloud and Kubernetes workload.
- **Ransomware Detection:** Proactive measures to identify and mitigate threats.
- **Immutable Storage:** Ensures data remains unaltered and secure from tampering.
- **Hardware Agnostic:** Turn any server and storage to a secure backup appliance.
- **Backup Flexibility:** Wide choice of backup targets from local storage to cloud-based solutions.

Catalogic Solution Portfolio

DPX — Designed for physical and virtual servers, applications, file servers, NAS, VMware and Hyper-V workloads to drive 3-2-1 data protection strategy such as disk-disk-cloud and disk-disk-tape. Capabilities include bulk VM recovery, instant virtualization, bare metal recovery and more.

DPX vPlus — Designed for a wide range of on-premise, edge and cloud virtualization workloads and Microsoft365. Supported platforms include Nutanix, Red Hat OpenShift, Scale Computing, Amazon EC2, Azure, Google Compute Engine, and more. Capabilities include crash-resistant agentless backup and snapshot management.

cloudcasa by Catalogic — Designed for Kubernetes workloads across services such as Amazon EKS, Azure AKS, Red Hat OpenShift, Google GKE, SUSE Rancher, etc and database workloads such as Amazon RDS, MongoDB and more. Capabilities include granular and dynamic recovery, replication and migration. Available is both SaaS and self-hosted deployment models.

Real-World Impact

> " *Without the secure data protection and ransomware protection offered by DPX, CreditGUARD could have found itself negotiating with cybercriminals or facing possible business shutdown.* "
>
> **– Casey Letizia - Network Manager at CreditGUARD**

> " *Today, I crashed our Elasticsearch on cluster infra due to an operational error. Then I restored the CloudCasa backup from yesterday! 540GB restored along with 1 billion documents!* "
>
> **– Manoel Frederico Beltrão - Judicial Analyst at TRE-PA**

Why Choose Catalogic?

Catalogic delivers more than just leading-edge data protection solutions; we ensure that our software continuously evolves to meet your business needs. Opt for Catalogic for unmatched support, ongoing enhancements tailored to your requirements, and a focus on cost-effectiveness that maximizes your investment. Our robust and adaptable data management tools empower your organization to thrive in a rapidly changing technological environment.

About Catalogic Software

Catalogic Software was founded in 1996 (previously known as Syncsort) is a privately held data protection software company.
