

What's New in Catalogic® DPX™ 4.5.3

Rethinking data protection with Catalogic DPX

This document summarizes the key new features in Catalogic DPX v 4.5.3. You can also find a comprehensive list of all the new features, feature enhancements, and fixes in the Catalogic DPX 4.5.3 Release Notes in the MySupport area at <https://mysupport.catalogicsoftware.com/>.

New Feature Information for Catalogic DPX 4.5.3

Feature	Description	Benefit
vStor Backup Repository		
DPX Archive support for vStor	<p>Host-to-vStor-to-media archiving is supported for Block backups, by using either the Block Backup Wizard or the Archive to Media Wizard in the DPX console.</p> <p>During a recovery job, if backups from vStor are unavailable, recovery proceeds automatically from archive media.</p>	<p>Allows vStor-hosted backups to be archived to tape or VTL for long term retention.</p> <p>Provides an alternate recovery route if backups are unavailable on vStor storage.</p>
Application Enhancements		
Microsoft SQL Server Point-in-Time Restore Support	<p>Point-in-Time restores are supported for Microsoft SQL Server databases. You can backup SQL Server transaction logs through a DPX backup job definition, enabling restores to a specified point-in-time.</p>	<p>This feature provides more frequent recovery points, enhancing SQL database protection.</p> <p>Restoring to a specific point in time can also help with business use cases that require copies of data, such as software test and development.</p>
Operating System Support		
Open Enterprise Server (OES) 2018 Cluster Support	<p>Micro Focus (Novell) OES 2018 is supported as a basic client in both standalone and cluster environments.</p>	<p>Extends DPX support to latest operating system release.</p>
