

# What's New in Catalogic® DPX™ 4.5.4

Rethinking data protection with Catalogic DPX

This document summarizes the key new features in Catalogic DPX v 4.5.4. You can also find a comprehensive list of all the new features, feature enhancements, and fixes in the Catalogic DPX 4.5.4 Release Notes in the MySupport area at <https://mysupport.catalogicsoftware.com/>.

## New Feature Information for Catalogic DPX 4.5.4

Feature	Description	Benefit
<b>Agentless Backup Support</b>		
<b>Archive support for Agentless backups to vStor target</b>	<p>Host-to-vStor-to-media archiving is supported for Agentless backups.</p> <p>During a recovery job, if backups from vStor are unavailable, recovery proceeds automatically from archive media.</p> <p>This feature complements archive support for agent-based block backups released in DPX 4.5.3.</p>	<p>Allows vStor-hosted backups to be archived to tape or VTL for long term retention.</p> <p>Provides an alternate recovery route if backups are unavailable on vStor storage.</p>
<b>Bare Metal Recovery Enhancements</b>		
<b>Windows BMR Support for vStor</b>	Bare Metal Recovery is available for Window Block backups to the vStor appliance.	Provides for recovery of physical Windows servers on new or different hardware.
<b>Linux BMR Support for vStor</b>	Bare Metal Recovery is available for Linux Block backups to the vStor appliance. Linux client nodes require kernel 3.10 or later.	Provides for recovery of physical Linux servers on new or different hardware.
<b>Virtualization Enhancements</b>		
<b>vSphere 6.7 Support</b>	VMware vSphere 6.7 is supported with virtualized features for both Block and Agentless backups.	Extends virtualization support to latest vSphere release.
